Profit & Loss Analysis:
  o Net Income from the P&L will be used as Qualifying Income for both personal and business bank statements.
  o Any amounts on the P&L representing salary/wages paid to the borrower/business owner can be added back and considered in the net income analysis.
  o Expense line items that can be added back to the business net income include depreciation, depletion, amortization, casualty losses, and other losses or expenses that are not consistent and recurring.
  o Borrowers utilizing business bank statements that own >=50% but <100% of a business will be qualified at the P&L net income multiplied by their ownership percentage.
  o The P&L expense ratio, Gross Income minus Net Income, divided by Gross Income, should be reasonable for the profession.
    ➢ Example: A home-based sole practitioner therapist/consultant can be expected to have a low expense ratio, while a retail business that has a full staff of employees and relies heavily on inventory to generate income will have a high expense ratio.

Bank Statement Income Analysis:
  o Eligible deposits from the bank statements should generally be within +/- 10% of the gross income (business accounts) or net income (personal accounts) as shown on the P&L.
  o An income calculated with bank statement documentation should be consistent with income documented by the borrower on the loan application.
  o Borrowers stated income on the 1003 should never be used for qualifying, even if it is less than the P&L income calculated above.
  o Any deposits into a personal account deemed to derive from a source other than the business (rents, SSI, joint account holder wage income, IRS refunds) must be excluded from the analysis.
  o NSFs require a borrower LOE to assess that they are not due to financial mismanagement or indicative of insufficient income.
  o NSFs should be covered with deposits shortly they are incurred.
  o Unusually large deposits (as defined by Fannie Mae) into personal accounts must be documented and explained via LOE.
  o Transaction history printouts are not acceptable.
  o Multiple bank accounts may be used.
  o Co-mingling of personal and business receipts and expenses in Personal Bank Accounts is not permitted. Evidence of comingling will require the loan to be submitted and qualified as a business bank statement loan.
  o If personal bank statements provided reflect payments being made on obligations not listed on the credit report, a thorough analysis must be performed and LOE provided from the borrower, as outlined below.
  o The above referenced guidance should be used in conjunction with the SGCP Bank Statement Calculator.

Express Documentation – One Year Tax Return With P&L:
  o One year personal and business tax returns (along with all schedules and K-1’s) plus a borrower prepared P&L covering time period since last tax filing.
  o If the P&L period covers less than 9 months, 3 months bank statements are required. If P&L covers more than 9 months, 6 month bank statements are required. Bank statements should generally be within +/- 10% of the gross income (business accounts) or net income (personal accounts) as shown on the P&L.
  o All borrowers must also provide evidence that business has been in existence for at least 2 years via CPA/Tax preparer letter, confirmation from regulatory or state agency, or applicable licensing bureau.
  o Self-employed borrower income in a licensed profession (i.e. Medical, Legal, Accounting) will be considered from a business that’s been in existence for less than 2 years, but greater than 1 year if the borrower has at least 2 years of documented previous experience in the same profession, or evidence of formal education in a related field.
  o IRS form 1040 personal and business 4506-T tax transcripts required for tax return year being used for qualifying.

Miscellaneous Income Source Requirements:

The wage earner 4506T should include W-2 transcripts only. Combination scenario must be qualified and priced as a bank statement loan.

- **Asset Utilization:**
  - The utilization of financial assets will be considered as borrower income to qualify for their monthly payments. The unrestricted liquid assets can be comprised of stocks/bonds/mutual funds, vested amount of retirement accounts and bank accounts.
If the assets or a portion of the assets are being used for down payment or costs to close, those assets should be excluded from the balance before analyzing a portfolio for income qualification. The monthly income calculation is as follows: Net documented assets (70% of the remaining value of stocks/bonds, 60% for all retirement assets) and utilization draw schedule of 10 years.

- Cash Out and Debt Consolidation not permitted.
